

"Our Vision: "To cultivate empathy and deepen understanding of one another through recognizing and celebrating neurodiversity"

April 2021

Dear Friends of FASCETS,

We, at FASCETS, value diversity, and we make it a priority in the recruitment of our Board Members.

We are now recruiting new Board of Directors members to join our team. This is a great opportunity to contribute to the great impact FASCETS continues to have in increasing awareness and understanding of FASD and other brain-based conditions.

We are currently recruiting for 4 board members with expertise and/or experience in the following areas:

- Diversity & Inclusion/Community Outreach
- Fundraising (individual and corporate donors/partners)
- Marketing
- Legal services related to non-profit organizations

Reasons to get involved as a volunteer Board member with FASCETS:

- You are interested in being part of a team involved in creating a paradigm shift, one where the connection between brain function and behaviors is understood and becomes the lens informing all systems;
- You want to be involved in creating a world where neurodiversity and all other ways in which people are different from each other are valued and seen as assets;
- You are passionate about and share the values articulated in our Vision, Mission and Diversity and Inclusion statements;
- You have expertise in some of the areas we are currently looking for and are excited to share them with FASCETS.

If this sounds like you or someone you know, please consider sending your resume, together with a short letter highlighting the following:

- Why joining the Board of FASCETS is calling you;
- The experience, knowledge or expertise you will be bringing to the team.

To learn more about FASCETS, please visit our website at www.fascets.org.

To apply, please send your resume and accompanying letter by email to Nathalie Brassard, nbrassard@fascets.org.

We look forward to connecting with you!

In gratitude and appreciation,

FASCETS Board of Directors

FASCETS VISION

"To cultivate empathy and deepen understanding of one another through recognizing and celebrating neurodiversity"

FASCETS MISSION

Through consultation, education and training, we:

- a. *Ignite a transformational process and understanding of brain-based conditions such as FASD from a personal and professional perspective through the use and application of the FASCETS Neurobehavioral Model*
- b. *Empower people to make positive changes in their relationships with others and their communities*
- c. *Develop an understanding of the source of our deeply held beliefs and values and how they inform our relationship with others*
- d. *Recognize that each person and their lived experience is unique and complex.*

FASCETS Diversity and Inclusion Statement

"Together, we create an equitable world and celebrate diversity."
